1. 1s
2. Expected It to increase over time
3. Ping RTT kept increasing
4. Since it is parallel and streaming was taking up bandwidth, downloading was slower
5.

TCP congestion window (cwnd) timeseries

TCP congestion window (cwnd) timeseries
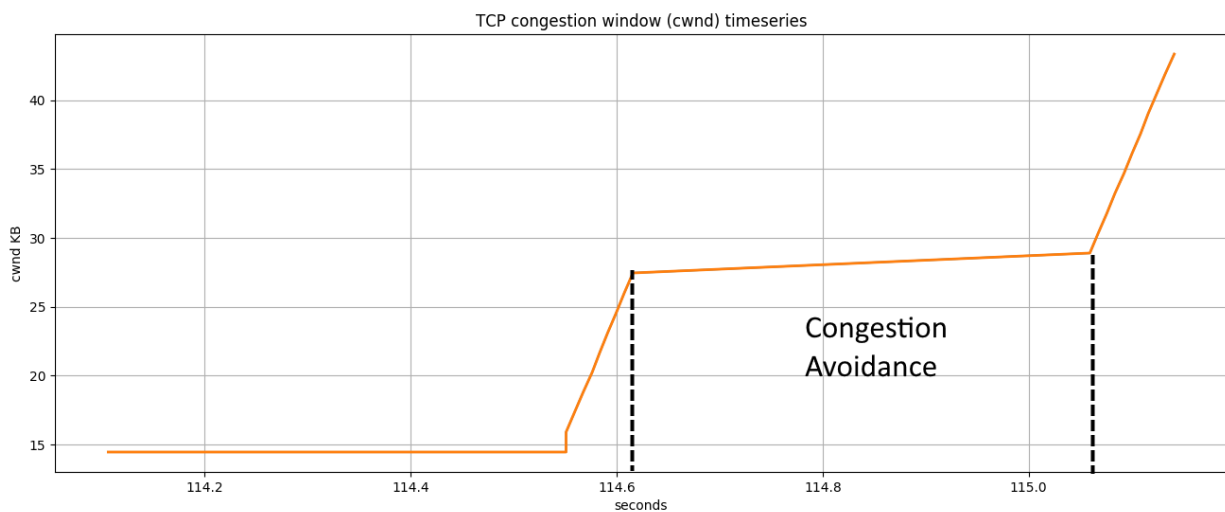

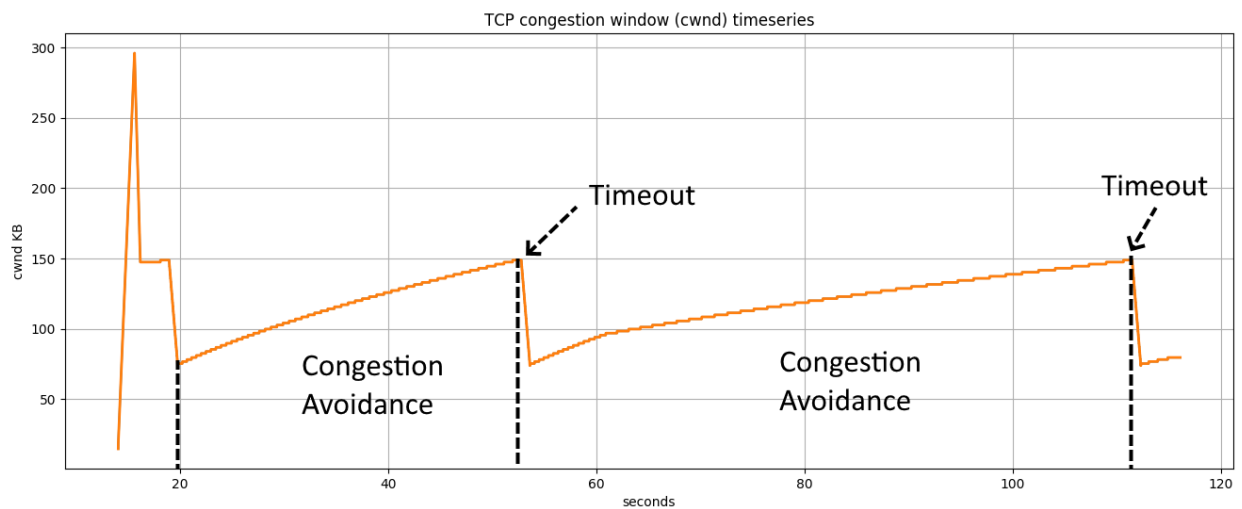

Started with slow-start, had some packet loss event and stuck to congestion avoidance after slow-start.

6.

TCP congestion window (cwnd) timeseries

TCP congestion window (cwnd) timeseries

Same as previous, slow-start then congestion avoidance. Seems to have a lot more packet lost event compared to when queue length was larger. Most likely caused by packet overflow.
